

BUILDING CERTIFICATION TEAM

Providing an efficient and professional service for all types of building and additions

Experienced building surveyors and assessment officers provide efficient, cost effective approvals, building certification and building inspection services including:

- Construction Certificate approvals for all building types
- As a Principal Certifying service (PCA) we provide all inspections during the course of construction
- The issue of Occupation Certificates on completion of building works

- Compliance with conditions of Development Consents
- Advice and consultancy services on the Building Code of Australia and technical standards.

We have the long term support and stability of Council and direct and immediate access to Council's approvals history and Council's Planning Officers so that we can provide quick advice and assistance to our customers.

For assistance and further information contact
